

# ARCTIC BREEZE TRUCK AC™ BY HAMMOND AIR CONDITIONING LTD.

## CSI CORRUGATED SERVICES INC.

August 17, 2009

Attention Fleet Managers:

We are a small, private fleet that operates day cab equipment only. We operate within a 250 mile radius with the bulk of our travel right here in the Metroplex. We set a goal of being "green" before it was fashionable. We had this goal before the no idle laws. We sought a means of maintaining driver comfort and economy which led us to **Arctic Wolf**.

If you are looking for a suitable alternative A/C and or heater unit which is "green friendly" and works, consider and compare the Arctic Wolf units to the competition and you will agree they are the best value and they do what they say they will.

Our drivers have occasional long waits in 100+ degree temperatures and yes even some frosty days in the winter. However, they have enjoyed the comfort of the **Arctic Wolf** units while saving fuel. We are pleased with ours and we highly recommend your consideration of these units.

Fleet Manager,

Delbert Whiteman
